SUMMARY

Full Stack Web Developer and Bachelor of Vocation (Internet of Things) undergraduate with hands-on experience in developing modern web applications using React.js, JavaScript, Node.js, Express.js, MongoDB, and Docker. Experienced in building responsive user interfaces, admin dashboards, REST APIs, and database-driven applications. Worked on real-world business solutions through internships and contributed to the Reyhub platform by developing scalable and reusable application modules. Passionate about solving problems through technology and continuously learning new tools and frameworks.

EDUCATION

Dayalbagh Educational Institute, Agra

Bachelor of Vocation (B.Voc) – Internet of Things (IoT), Relevant Coursework: Internet of Things (IoT), Web Development, Database Management, Software Development, Embedded Systems, Networking Fundamentals

Expected Graduation: 2027

EXPERIENCE

Full Stack Developer Intern

One Place Solar

Kamla Nagar, Agra

- Developed and maintained web applications using React.js, Node.js, Express.js, and MongoDB.
- Worked on the Reyhub platform and contributed to Dashboard, Modules, Sidebar Navigation, and Roof Material features.
- Built reusable React components and integrated REST APIs.
- Collaborated with developers to implement business requirements and improve application performance.
- Used Git, GitHub, and Docker as part of the development workflow.

Web Developer Intern (Remote)

Skill Orbit India

- Developed responsive and user-friendly web pages using HTML, CSS, JavaScript, and Bootstrap.
- Assisted in frontend integration and backend support.
- Performed testing, debugging, and optimization of web applications.
- Collaborated remotely with team members and maintained project documentation.

PROJECTS

Reyhub Admin Platform | Tech Stack: React.js, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB

- Developed and enhanced Dashboard, Modules, Sidebar Navigation, and Roof Material management features.
- Built reusable UI components for scalable development.
- Integrated APIs and managed dynamic data rendering across multiple modules.
- Improved user experience through optimized performance.
- Collaborated with the development team to deliver business-focused solutions.

IoT Monitoring System | Tech Stack: React.js, Node.js, MongoDB, Docker

- Developed a monitoring dashboard for collecting and visualizing IoT device data.
- Implemented backend APIs for device communication and data management.
- Used Docker for containerized development and deployment.
- Worked on real-time data visualization and system optimization.

Full Stack Web Applications | Tech Stack: React.js, Node.js, MongoDB

- Developed database-driven web applications.
- Implemented authentication, CRUD operations, and API integrations.
- Focused on clean UI design and optimized user experience.
